NONAPOD ALUMINIUM FRAME ONLY (3 modules) - £12,800 - £19,800 + VAT

DIY OPTION

This option is for skilled do-it-yourself enthusiasts who want to build their own bespoke glamping pod using our aluminium structural frame. We recommend a minimum of three modules - total combined length 7.5m. Larger lodges are created by adding more modules - each module is 2.5m long.

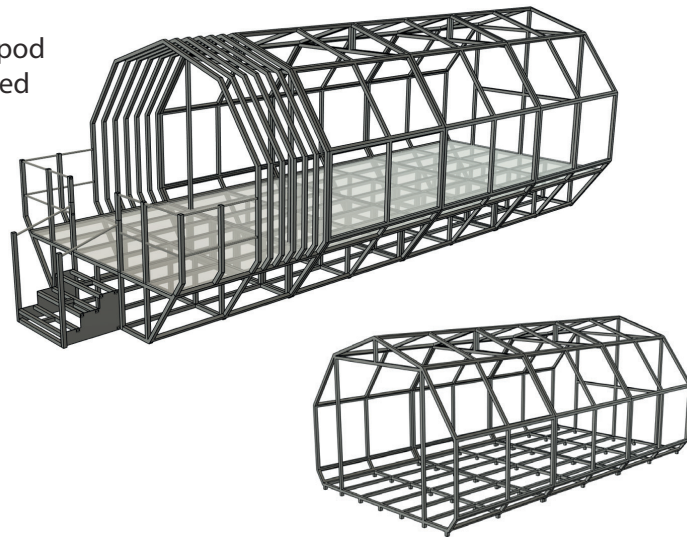

- Self-assembly option - save money - create your own bespoke lodge.
- Only one tool required to assemble the LOCX frame - TORX MB
- Free instruction seminars and advice on assembling the LOCX System.
- Aluminium profiles and connectors are flat packed on a pallet.
- For seasonal use, frames can be dismantled, flat packed and stored.
- Assembly instructions - colour coded parts and diagrams.
- Flat packed on a pallet and delivered to mainland UK.

Raised 'Flood Defence' Pod (4m high) includes approx:

- 418 Pieces of Aluminium profile - 4 holes drilled per profile
- 1500+ laser-cut aluminium pieces + rivets + rivet-nuts for connectors
- 1672 stainless steel pan-head MB torx screws
